80 years' experience
Ezpeleta was founded in 1935 in Oñati (Guipuzcoa - Spain) as a rain umbrella manufacturer. Since that time the company has been continuously growing in terms of product ranges and facilities. Today Ezpeleta has become a leading European manufacturer of outdoor furniture, parasols and umbrellas.

PRODUCTION IN EUROPE AND ASIA

Ezpeleta’s main factory is located in Vila Nova de Cerveira (Portugal), just where the road from Porto to Vigo crosses the border. Nevertheless, the company combines this European production with the production in Asia, offering customers the advantages of a dual source but with the simplicity of having one single account manager to deal with.
5,000 clients
Ezpeleta has production and **technical skills for fabrics, metals and plastics**. As a result, parasols, parasol bases, chairs, tables, cushions, verandas, pergolas... are all produced by Ezpeleta and customers can easily furnish the **complete terrace with one single supplier**, thereby also overcoming the complexity of matching colours between the different elements.

**Full service from product briefing to delivery**

Ezpeleta has its own industrial designers, production and quality engineers, product specialists, marketing specialists, account managers... And, thanks to this fact, Ezpeleta has developed several in-company products, from a simple idea or briefing right up to final delivery, for the most important European brands of beverages, coffee and ice creams.
Ezpeleta has a **wide range** of formats, qualities and finishing of parasols. All of them can be customized with different methods of printing to maximize the corporate identity of our clients.

Ezpeleta offers extensive customization facilities, supporting, advising and managing the process from the beginning to the end. All this in order to obtain an effective brand communication and a fast and excellent return on investment.

In our opinion the best support for brands is the **full terrace: parasols, chairs, tables and complements.** Ezpeleta designs and produces many chairs and tables models in fiberglass reinforced polypropylene by gas injection and compact table tops. All of them are personalized with brand colours and corporate images using different printing techniques.
